

(The download may be a version which is later than the version included in this document. Those versions are maintenance updates created for specific purposes and do not contain significant changes to the latest version shown here)

1.5.788 January 21, 2024

Cleans up several bugs recently reported.

Updates to the 6000 series patio doors, including multi slide models.

Fixes pricing issues found between this order entry program and the web order entry program.

1.5.750 September 27, 2023

Updates the new painted window lineal changes, to reflect the latest color combinations and pricing.

Fixes several smaller issues.

1.5.740 September 11, 2023

Add new "Painted Lineal" colors to frame color options.

Includes the September 11, 2023 price increase.

1.5.729 July 25, 2023

Maintenance update, fixes several minor bugs.

1.5.725 July 6, 2023

Corrects a pricing issue on IGUs with Indium glass, if immediately preceded by a normal window model.

1.5.724 July 3, 2023

Corrects models 6821, 6831 and 6842 jamb widths to 4- ½"

Adds Dual Wall Flush Fin to the 5800 series models.

1.5.722 July 1, 2023

Includes the July 1, 2023 price increase.

Adds interior blinds for certain window models.

1.5.719 June 13, 2023

Fixed issue with the new contemporary patio door handles

Adds 1000 dual wall flush fin frame to the special shapes windows.

1.5.714 May 31, 2023

Adds Adobe to the 6000 series patio doors.

Adds 3000 dual wall flush fin frame to the special shapes windows.

Add 452 Neat glass to 6000 series windows and doors.

Fixed a refresh issue with the new contemporary patio door handles.

1.5.711 May 15, 2023

Fixes issue with not showing all available Low-E types for IGU's.

Adds sound glass back to 3800 series patio doors.

1.5.706 May 3, 2023

Fixes the error "fblnd_ems" that was displaying for casements, awnings and patio doors.

1.5.698 March 29, 2023

Fixes issue where special vent opening settings were not saved.

Cleans up several bugs reported since the last update.

1.5.680 January 20, 2022

Updates to the 6800 series patio doors. Fixes several bugs in sizing and options.

1.5.664 November 8, 2022

Updates textured and non-textured carbon black paint names and codes.

1.5.654 October 17, 2022

Cleans up several bugs reported in the since the last update. Improves the functionality of the pricing calculator, and markup formulas.

1.5.629 September 19, 2022

Includes pricing adjustments for Flush Fin and J-Channel main frames

1.5.617 August 30, 2022

Fixes the issue where adding grids to a T-Bar model could through an error.

1.5.610 August 2, 2022

Fixes the following two minor bugs reported since the release of version 1.5.605

1. Receiving an error indicating "File is open", and halts program execution.
2. Fixes an issue where a markup formula may be purged when viewing the markup formulas in a quote.

1.5.605 August 1, 2022

Includes the August 1, 2022, price increase.

Add new model number "SCRN" for ordering screens only. Pricing for each screen is included.

Adds the ability to choose and pick an address approved as exempt from delivery charges.

Enables a global change of model numbers between 1000 and 3000 series windows. Exempt from this is 3000 Series patio doors, Awnings, Casements, 4000 series, 6000 series, some Special Glass Packages, IGU's, Miscellaneous Items and other non-window items.

Changes the way to select deferred screens. Only the deferred screen selection needs to be made, or setup as

a default in system settings. You can also select a ship to address, but it is not required. Delivery charges could apply. The estimated delivery date for deferred screens will be determined on the current plant backlog.

1.5.563 April 25, 2022

Includes new patio door screen options and an upgraded patio door screen roller option.

Includes the April 25, 2022, price increase for casements, awnings, and mulled windows.

Enables creating a quote/order text file by using the "Print" option instead of exporting/importing.

1.5.562 April 4, 2022

Adds improvements to applying Delivery Charges when requesting local delivery.

1.5.554 March 22, 2022

Fixes the "fdelchg field not found" error when creating or opening a quote or order.

1.5.552 March 16, 2022

Updated the NFRC tables to reflect the energy values for the model 3410FS.

1.5.533 February 14, 2022

Update patch to update 1.5.332

Fixes issue where model "ADDMULL" detail does not display.

1.5.532 February 14, 2022

Update patch to update 1.5.531

Fixes issues where some entered items would generate an error, when re-opening a quote or order, and only one line item existed.

1.5.531 February 14, 2022

Includes the February 14, 2022 price increase.

Fixes global update feature for Low-E.

Adds a "Manual Email" EDT method for order submission.

Removes the "Pull Rail" screen option.

1.5.502 November 22, 2021

Fixes bug when selecting a spacer option other than Stainless Steel.

Fixes incorrect pricing on the 6800 series Patio Door when triple glaze glass is selected.

Adds the Genius ZigZag Screen to the 6800 series patio doors.

1.5.495 November 15, 2021

Adds the November 15, 2021, price increase.

Adds the 6800 Patio Door models.

Removes black spacer from being an available option.

1.5.470 October 4, 2021

Adds Local Delivery Charge as functional part of a work order.

Adds two different variations of Email EDT Delivery.

Fixes a bug that caused normal EDT Transmission to fail.

1.5.464 September 20, 2021

September 20, 2021 price increase.

1.5.455 August 6, 2021

Fixes bug for 6000 Series T-Bar Picture windows (6020, 6030, 6040 & 6050)

Adds Fiberglass stiffener to models "NMULL" and "OMULL"

1.5.449 August 2, 2021

Includes the new pricing effective August 2, 2021

Adds a new alternative method to send in EDT orders that can be used if the normal function is not working or being blocked by security software. Select "Settings -> Defaults -> EDT File Send Method" to choose it.

1.5.436 July 12, 2021

Fixes the pricing issue when select BC colored windows.

1.5.399 May 17, 2021

Includes the May 17, 2021 price increase.

Fixed the issue where some systems were unable to print PDF files.

1.5.362 March 1, 2021

Adds the new 6000 series window line.

Fixes several reported bugs.

1.5.299 August 10, 2020

Adds new glass size combination 28/30 with clear glass for 366 with or without Neat and 270 without Neat only.

Adds Carbon Color (BC) for Casements and Awnings, with the exception of Triple Glaze IGU's or with Flush Fin.

Allows Low-E Global Updates for all Triple Glaze glass. Note that Low-E Global updates for dual glaze and triple glaze must be done independent of each other.

Fixed several minor bugs.

1.5.281 March 17, 2020

Includes the March 17, 2020 price increase.

Adds a drop-down box to the Ship To address state field, allowing a selection from a list of valid state codes.

Added a new feature for resetting orders submitted via EDT. Allows for the resubmission of an order even if it had already been sent via EDT. This is done by unlocking the EDT status with a code provided by the the Coeur d'Alene Window Company Customer Service Department.

Eliminates the availability of the standard rolled frame patio door screen if the "Coastal Hardware" Package has been selected. Stainless Steel rollers are not available for the standard frame.

1.5.278 February 24, 2020

Modified the WMS Order Entry Setup Program so that it installs the entire program contents. Even on some systems that would fail and then require manually installing the order entry files.

Added the ability to select Dealer Sub-Accounts when transferring WMS records from one location to another.

Popup advisory added when selecting the "Ship to Dealer" option and the ship to address is not the same as the Dealer Address.

Added the "BC" frame color and Exterior "KC Black" color to the window image drawing.

Fixed the issue where the black/white grid bar code would not always save with the order.

Added a grid converter that will attempt to change grids to match a newly selected frame color.

If a grid color match could not be made, then the "Custom" grid type is selected, and the user is advised to validate the grid bar type and color.

Fixed several bugs in the Screen selection option.

Fixed several bugs in the Screen Global Change function.

Modified changing the frame color "BC" to make it easier to switch between the frame color "BC" and painted frame colors.

Added the frame color "BC" to the global update system.

Fixed a bug where globally changing Low-E would not apply to certain patio door models.

Fixed the global change for Foam so that Main Frame and Sash, or Main Frame only, will properly update.

Fixed a bug in the EDT submission system that existed on some Windows computers.

Fixed a bug where the NFRC Values were not being displayed on certain Mull Models.

Fixed a bug where the NFRC Values were not being displayed on certain triple glaze glass units.

Updated the option selection memorization feature to allow for a mix of "BC" colored frame and KC Black painted frame product.

Example: (Sequence of entering line items in a quote or order)

- Enter 1 or more line items with frame color "BC"
- the system will remember "BC" as your selected color after the first line item is completed
- paint selection (Decor) will be disabled

- Enter a patio door, which currently does not have frame color "BC" available.
- the frame color will default to "WH"
- (as long as you do not select a frame color, the system will not remember "WH" as your selection)

-
- you select black paint inside and out
(the system will remember your paint color selection)

 - Enter 1 or more line items with the color of "BC"
 - after you enter the model number, the selection color of "BC" will display
(if you made a different color selection while editing the patio door, then that color will display, you will need to reselect "BC" to make it the selection color again)
 - paint selection (Decor) will be disabled

 - Enter a second patio door, which currently does not have frame color "BC" available.
 - the frame color will default to "WH"
(as long as you do not select a color, the system will not remember "WH" as your selection)
 - the painted color selections (Decor) made on the prior patio door will also be applied and displayed
(the system will continue to remember your paint color selection)

As long as you do not make a frame color selection, after making the first frame color "BC" selection, then the frame color "BC" will continue to be the selection color and applied to product where available. Where not available, the color selection for that item only will default to frame color "WH". Paint selections (Decor) will be remembered until changed or turned off by the user but will not be available for frame color "BC" product.

1.5.255 November 25, 2019

Completed the addition of Black Cap Stock material.

Added Carbon Paint Color.

Adjusted minimum awning size to 14 inches.

Various bug fixes.

1.5.247 September 4, 2019

Addition of Carbon series vinyl (dark cap stock)

Fiberglass reinforcement option

New ADDMULL for 3000 series (1/2 inch thickness)

Updates to paint options

New black casement/awning handles

New positive action auto locks

Updates U-values for 1000 series, double-hung

Single Wall Flush Fin option for 1000 series

Coastal hardware option

Various bug fixes

1.5.226 April 22, 2019

Adds In-Lite Tempered as a window option

Updates frame stiffener settings.

Includes latest NFRC updated energy values.

Fixed a couple of bugs.

1.5.218 February 21, 2019

Fixes the print error that occurred when selecting some Miscellaneous item part numbers.

1.5.217 February 18, 2019

Fixed an NFRC bug with 180 Lowe that was discovered after release of Version 1.5.216.

1.5.216 February 18, 2019

Includes the February 18, 2019 price increase.

Updates the NFRC ratings table.

Includes some bug fixes.

1.5.186 April 2, 2018

Increases max size of model 3132 to 144 x 60 and 3121 to 96 x 60.

Includes the April 2, 2018 price increase.

Adds new color selections, in two styles of paint, for painted windows.

Fixed a glass strength bug when selecting i89/366 or i89/270 glass types.

1.5.179 January 29, 2018

Adds Pull Rails to regular and Ultra-View Screens.

Adds Vent Stops and WOCD Locks as available along with the Plunge Locks.

Fixed issue where some option choices, when changed, were not being "remembered".

1.5.170 January 15, 2018

Maintenance update fixing several report bugs.

Adds "ADA" Locks as an option selection were applicable.

Improved the ability to export/import quotes and orders between computers using a thumb drive.

1.5.140 August 7, 2017

Includes the August 7, 2017 price increase.

Adds 270/Indium, with or without Neat, as an available glass package.

Allows the Neat glass option to be removed from LoE 366 glass packages

Addresses bug were correct work order is not displayed after a quote conversion.

1.5.136 July 16, 2017

Adds 11/16 and 5/8 as available IGU overall thicknesses.

Fixed the issue where the long side handing could not be entered for Trap IGU's.

Fixes issue where IGU Overall could not be entered or changed on a prior quote/order.

Completes pricing for triple glaze IGU's with Indium glass configurations.

1.5.132 July 10, 2017

Adds new glass options and pricing to Triple Glaze IGU's.

Fixes a global update error when globally updating LowE.

1.5.131 July 5, 2017

Adds new glass options and the ability to select exact grid bar locations on model "IGU".

1.5.130 June 5, 2017

Maintenance update, fixes pricing issue with tempered IGU's.

Adds Light Bronze and Dark Bronze glass spacer.

1.5.127 May 1, 2017

Adds the "Craftsman" series equal site window package to the 3000 Series operating windows.

Adds "SDL" surface grids to the 1000 and 3000 window lines.

1.5.125 April 10, 2017

This is a maintenance update. You can ignore this update if you are running version 1.5.124 and have not been advised by the Coeur d'Alene Window Company to install version 1.5.125.

1.5.123 April 6, 2017

Resets patio door list pricing to prior levels and fixed a few report bugs in release 1.5.120

1.5.121 April 5, 2017

This is a maintenance update to fix issues discovered by some users in Release 1.5.120

1.5.120 April 3, 2017

Includes on-factor adjustments, grid pricing adjustments and patio door screen pricing adjustments.

New "stock" patio door glass package configurations.

Reduces price for zinc auto locks.

Added extruded frame with Ultra-View screen to available patio door screen options.

Added "Greylitell" and "Solar Cool Bronze" to available glass options.

Added all available grid color and style options regardless of window color.

Removed the 1000 series "Bay/Bow" models – the 3000 series should be used instead.

1.5.115 January 7, 2017

Added pricing for models 1263, 3263 and 3410FS.

New advisory to select model 3310 instead of model 3010 for special shapes to reduce extended lead times.

Adds more functionality to the model ADDMULL. You now select the 2 line items that are to be mullled and the orientation. It is no longer necessary to enter descriptive text.

1.5.110 December 7, 2016

Improves adding email addresses and fax numbers for receiving work order confirmations when orders are sent via EDT.

Cleaned up some pricing issues with model IGU.

1.5.106 November 5, 2016

Fixes the issue where 1000 or 3000 series windows with 366 Low-e would not price. If you have updated to Version 1.5.105 then you should immediately update to this version.

1.5.105 November 3, 2016

Added the new "K" frame for the 3000 Series line.

Removed the 4000 Series single slide and single hung from the product line up.

1.5.100 October 6, 2016

Added Graphite screen frame as the default screen when painting windows

Includes dimensional manufacturing limits for the 3000 Series Casement and Awning windows.

1.5.97 September 6, 2016

Fixed the zero pricing issue with model 3511 and 4000 Series Patio Doors with 366 glass or painted frame.

Removed the model "GARDEN" from the product line up. Contact the Coeur d'Alene Window Company for pricing when needing a Garden Window.

Updated the screen selection prompt on 3000 Series Patio Doors so that all screens are available for selection.

Added new option "Egress Hinge" for 3000 Series Casement windows. Egress Hinges are the default for Casement windows with a 2/6 width (net 29.50 inches). It can be manually changed back to regular hinges.

Added Fresh Air Vents to model 3310.

Added NFRC Weighted Average Energy Efficiency. Displays the total NFRC U-Value weighted average for the entire order in both the Dealer Profile screen and the Window Detail Screen. Can optionally be selected at print time, or made the default print selection in the "Settings" option from the main window. A detail report is also available by double-clicking in the NFRC Weighted Average text box label in the Dealer Profile Screen or the Window Detail Screen. The Detail Report contains all NFRC Efficiency Values Weighted Average and all the data used to arrive at the values.

Added new System Setting for Measure Type. Available choices are Rough Opening or Tip to Tip. The default Measure Type selection will persist until user action changes to the another selection. Entering a "Callout" in the width or height field still automatically defaults to Rough Opening for that line item only and will not change the current default.

Added the total square feet of windows and doors to the last page of Quotes and Work Orders.

1.5.93 August 8, 2016

Removed 4000 Series Casements, Awnings and Patio Door models as they are no longer available.

Advises that all other 4000 Series windows are no longer stock items, and if ordered are subject to significantly longer delivery lead times.

Fixes the issue where selecting Ultra-View Screens would not persist.

1.5.92 July 26, 2016

Work orders include both NFRC values for individual line items and the weighted average.

1.5.91 July 11, 2016

Maintenance Release – Fixes an issue assigning glass thickness. This occurrence has only been identified with glass packages with no Low-e coatings (Clear/Clear only).

1.5.89 July 5, 2016

Fixes a bug that caused the incorrect discount to be assigned for model NMULL.

Adds J-Channel main frame to the 1000 series line.

Reduces the price for J-Channel and Flush Fin main frames.

1.5.80 April 15, 2016

Updates the paint price when painting a screen on a painted window. Black and Bronze screens are provided at no additional charge. All other painted screens are subject to a surcharge.

Includes the April 15, 2016 price increase.

Modified the sizes for the model 3310T to reflect rough opening size verses net frame size.

Includes 50% off Neat on Low-e 270 for 90 days effective April 15, 2016.

Fixed the bug in the pricing calculator that would force a quote price to re-compute using the wholesale on-factor.

Improved the EDT send time by forcing the EDT document type from a "ZIP" file to a "Text" file.

1.5.76 March 7, 2016

Adds model 3310T, a dedicated frame picture window with stock patio door glass. Also provides available sizes by use of the Size Button.

Adds the 3000 Series Casement and Awning models, including common T-Bar configurations.

Adds the 25mm Contour and 1" flat grid bars to the grid selection area.

Includes pricing for three and four lite patio doors with transoms.

(Note: Versions 1.5.54 through 1.5.75 were maintenance releases for production purposes only.)

1.5.53 November 1, 2015

Improved the speed when using the Quote/Order Import-Export function, and added the ability to search for a quote or order in the Order Entry tables prior to running the import or export.

Removed the 2000 Series from the available product lineup. The 3000 series should be used instead.

Added a button just after the model width field for patio doors. When clicked, available stock rough opening sizes will display for the patio door model entered. Choose the desired size from the list and the width & height fields will automatically populate with the sizes selected. This will ensure the stock patio door pricing is applied.

Set the default Low-E to 270/Neat for Insulated Glass Units (IGU).

1.5.50 October 1, 2015

Includes the new 5800 series French Rail Patio Door.

Preserve is standard and included on all windows and doors.

Makes Neat Glass the default for 270 Low-E and always included with 366 Low-E.

Small price adjustments for windows over 40 square feet, double-hung based models and special shape windows.

Fixed several known bugs with Grid Bar and Grid Pattern selections.

1.5.48 September 1, 2015

Applies a minimum paint charge, which includes the protective covering.

Forces the selection of a grid pattern when choosing grids. This prevents the system from assigning an erroneous default grid pattern.

Updated the IGU model to show an alert message if no overall thickness was entered, or if grids were selected and grid pattern or grid color was not chosen.

Incorporated a "Model View" window as an alternative to the "Tree View" when pressing "F2" to display a list of available models in the detail window. Right-Click in the "Model:" field to switch between the two views.

Added functionality to check for an available program update each time the program is started.

1.5.42 June 17, 2015

Maintenance release. Unless advised otherwise, you do not need to download this version if you are running version 1.5.37 or later. This release includes maintenance adjustments for notified dealers.

1.5.41 June 15, 2015

Maintenance release. Unless advised otherwise, you do not need to download this version if you are running version 1.5.37 or later. This release includes maintenance adjustments for notified dealers.

1.5.40 June 8, 2015

Maintenance release. Unless advised otherwise, you do not need to download this version if you are running version 1.5.37 or later. This release includes maintenance adjustments for notified dealers.

1.5.39 June 5, 2015

Maintenance release only. Unless advised otherwise, you do not need to download this version if you are running version 1.5.37 or later. This release includes maintenance adjustments for notified dealers.

1.5.38 June 3, 2015

Maintenance release only. Unless advised otherwise, you do not need to download this version if you are running version 1.5.37 or later. This release includes maintenance adjustments for notified dealers.

1.5.37 June 2, 2015

Fixes the issue where the calculator did not properly apply the preserve costs in the wholesale price. (This only occurred if you are modifying the Retail Discount to build your markup)

1.5.36 May 29, 2015

Allows for "txt" file EDT submission, where IT security rules do not allow the use of "zip" files.

Contains a patch that could help program installation difficulties where user security rights or other previously installed applications can prevent our program library file from properly installing.

1.5.35 May 26, 2015

Fixes the issue in the Calculator that occurred when attempting to reassign a 3000 series discount.

1.5.34 May 20, 2015

Fixes issue where the 4000 Series Price Table may not have updated in Version 1.5.33

Added the ability to paint the interior on model "AMULL".

1.5.33 May 8, 2015

Includes the NFRC Rating Values for the 1000 Series Window Line

1.5.32 May 5, 2015

Fixes several bugs found with the roll out of the new 1000 Series window line.

1.5.30 May 4, 2015

Includes the new 1000 Series window line.

Includes the latest updates and features to all window lines.

1.5.27 March 11, 2015

Cleaned up several minor issues.

1.5.26 March 5, 2015

Fixed the error that occurred when entering an iFrame window.

Fixed issue where wholesale on-factors may not have properly posted to update 1.5.25

1.5.25 March 2, 2015

Update Foam pricing.

Added Gray and Black colored spacer.

Updated painted frame pricing.

Move color Bronze from a frame color to a Décor option.

Added new Heavy Duty patio door screen frame with Ultra View mesh.

Foam now a standard option with the R4 package.

Removed the default IGU overall thickness for the IGU model numbers

1.5.22 December 8, 2014

Fixes the discount issue on the "GARDEN" window model. (Net Price – No Discount Applies)

1.5.21 November 21, 2014

Includes NFRC Values for 3000 series windows tested with Foam Fill.

1.5.20 October 8, 2014

Fixed the screen with lift rail option on the 3000 series so that it now prices correctly.

Removed "Lift Rail" as a screen option for patio doors.

1.5.19 October 1, 2014

Includes the 2000 Series price adjustment.

1.5.18 September 25, 2014

Fixed a bug when printing Call-outs instead of measured size.

Fixed an issued with the Calculator and assigned discounts.

Corrected screen availability for the 3000 series windows.

Fixed several other report issues.

1.5.17 September 1, 2014

Cleans up several issues found with release 1.5.16

Improved the setup program when using windows 8

1.5.16 August 15, 2014

Maintenance release to address minor issues found in release 1.5.15

Fixed deferred screen charge from clearing from the Dealer Profile screen.

Addressed the issue with 3000 series markups not applying correctly.

1.5.15 August 14, 2014

Added the new 3000 Series Window Line.

Replaced CDA & PDA package identifiers with 4000 Series, 3000 Series or 2000 Series window line.

Renamed and added new packages:

Renamed:

270/Argon (The old PDA Package with Cam Locks)

366/Neat (The old CDA Package)

Added:

R4 (366, Neat, i89 Indium, Auto Lock)

Solar-S (Now includes the 3000 Series Window Line)

Added pricing for two lite patio doors with transoms.

You can choose either tempered or annealed glass in the transom of a patio door with transom model. The price will adjust accordingly.

Made Ventilators a mandatory selection for each line item.

Changed the Quote/Order search window to display items in descending order, with the option to additionally sort by date of last edited.

When replicating a Quote you can select to append the Alpha Indicator to the end of the current quote number or have the system assign the next available new quote number.

1.5.11 April 2, 2014

Fixed issue with missing information when printing miscellaneous items on quotes/orders.

Fixed the error that occurred when selecting tempered glass on T-bar models.

1.5.10 February 28, 2014

Fixed issue with window accessories not being able to be removed once selected.

Fixed the error that occurred when selecting tempered glass on T-bar models.

Combined the prompts that could appear for patio doors into one common prompt.

Fixed the issue where model 2121 was not defaulting to Auto Lock.

1.5.9 February 17, 2014

Minor maintenance update. You only need to install this update if you are currently running Version 1.5.6 or earlier.

1.5.8 February 10, 2014

Added the ability to hide mulls & T-Bar sub-unit information when printing quotes and orders.

Added the ability to change the background color of the window image section, in the Detail window.

Improved the pricing of miscellaneous items on the pricing calculator

Expanded the search capabilities for quotes and orders.

Increased the size of the "Location" field to 25 characters

Increased the size of line item comments to 72 characters

Added a new line item comment for quotes only, than can be used to supply information to your customer.

Added a new field, "Customer Reference" to hold your customers unique reference to a quote.

Provides an advisory when an oxo patio is greater than 180 1/2", advising that field glazing and setup is required.

Added the ability to call & edit markup formulas and discounts in the pricing calculator.

Added a new special handling model, "MATERIAL" for quotes.

Added the option to carry over special handling part numbers from quotes to work orders.

1.5.6 December 11, 2013

Added the ability to change the window frame color and globally update the entire quote or work order .

1.5.5 December 1, 2013

Added a new special model "DEFSCN" that allows for a Deferred Screen Delivery Charge on the Quote side only, and will not carry over when converting a Quote to a Work Order.

Added "Quantity Total" text box on the Pricing Calculator to show total items on a Quote.

1.5.4 November 21, 2013

A new advisory window indicating the default option for locks has been change to "2" locks. This occurs only when the system defaults to "2" locks because of the window size, and then the software operator subsequently changes the lock type (i.e. Cam to Auto). This action forces the default option to "2"

locks, and the advisory window lets the operator know that if "2" locks is not the desired default, then it must be changed back to "1" lock on the next window.

1.5.2 October 29, 2013

Improved program usability via the keyboard.

Improved the dealer search screen.

1.5.1 October 21, 2013

Print NFRC u-values for each sub-model of a common T-Bar window.

Disabled the "Next", "Dupe" & "Delete" buttons when not in Edit Mode.

Added pricing for triple glaze IGU's.

1.5.0 September 30, 2013

Increased the maximum Patio Door width/height restriction from 93" to 96" (95 ½" net)

Added Satin Etch and Delta Frost glass types.

Fixed the pricing calculator so that all line items display in line item order.
