

FINALLY, A DOUBLE-HUNG WINDOW DESIGNED FOR THE RUGGED WEST!

The Coeur d'Alene Series Double-Hung Window is the first vinyl double-hung window designed specifically for today's demanding environment.

The double-hung features thermal-set quick remove sashes designed to be more energy efficient and longer lasting than high maintenance tilt sashes. This feature also allows you to enjoy the true balance of equal-sight-line sashes.

The solid complete frame design provides significantly more strength than traditional double-hung jambs that flex during installation and operation.

A beveled exterior adds curb appeal while deep weather-stripped pockets and a pocketed sill with weep holes protects you from the elements.

**Stylish Beveled Exterior
True Equal-Sight Glass**

Thermal-Set Quick Remove Sashes

Neat Glass
(Easy Clean)

Low-E 366

Argon Filled

European styled
zinc auto-lock

XL Edge High
Performance Spacer

The glass is protected with Neat Glass from Cardinal. Neat's hydrophilic sheeting process keeps your windows cleaner longer.

Low-E 366 glass is the ultimate in performance and clarity. It keeps the heat out in the summer and keeps your home warmer in the winter.

XL Edge IG glass comes with the lowest failure rate and provides among the best thermal performance in the industry.

Our sleek, European-styled zinc auto-lock is also available in an upgraded oil-rubbed bronze or brushed chrome version.

All Coeur d'Alene Series Double-Hung Windows are backed by our Limited Lifetime Warranty.
