

PATIO DOOR

Coeur d'Alene Window Company patio doors are engineered for quality. Every Coeur d'Alene Series patio door includes our popular Low-E 366 coating, argon gas and Preserve protective film. Neat low maintenance glass is also standard on our top line patio door, meaning you will clean your windows less often.

Each patio door closes with our sleek European style handle. When you lock your door, you can rest assured

knowing that The Coeur d'Alene Window Company uses only multi-point locking hardware on our patio door systems. That's just one reason why more consumers are choosing The Coeur d'Alene Window Company. We refuse to cut corners. Our doors are more than strong; they are energy efficient as well. With Low-E 366 and argon gas, our doors exceed today's Energy Star threshold. We even offer a triple glaze option for those who want the most efficient products available.

COEUR D'ALENE SERIES NFRC TESTING	U-VALUE	SHGC
4800 Patio Door Argon gas, Neat, XL Edge, Low-E 366	0.29	0.23
4800 Patio Door Argon gas, Neat, XL Edge, Low-E 366, Triple Glaze	0.21	0.20

The glass is protected with Neat Glass from Cardinal. Neat's hydrophilic sheeting process keeps your windows cleaner longer.

Low-E 366 glass is the ultimate in performance and clarity. It keeps the heat out in the summer and keeps your home warmer in the winter.

XL Edge IG glass comes with the lowest failure rate and provides among the best thermal performance in the industry.

All Coeur d'Alene Series patio doors are backed by our Limited Lifetime Warranty.
